

ETHICS ASSESSMENT IN RESEARCH & INNOVATION: POLICY ENCOUNTERS

Venue: UNESCO, UN House, 5th floor, 14, Rue Montoyer, B-1000, Brussels

23 May 2017

Introduction: Based on its findings and results, SATORI envisages various roles for policymakers in supporting ethical research and innovation (R&I). Policymakers can help: promote the use and implementation of the SATORI ethics assessment framework at the EU and member state level; support future research and the development of the SATORI ethics assessment framework; support the work of existing ethics committees and set up new ethics committees (in sectors where these are missing); monitor whether ethics assessment in R&I is achieving its objectives and take corrective measures; incentivise responsible research and innovation at the SME level; and increase stakeholder participation and public debate about ethics assessment in R&I.

Aims of the workshop: To discuss SATORI policy recommendations and the means to foster their sustainability; to discuss how policy decisions can nurture or restrict ethics in R&I; and to share how policymakers can further support and optimise ethics in R&I using SATORI results.

AGENDA

09:00-09:30 **Registration**

09:30-10:00 **Introduction to SATORI ethics assessment Framework and policy briefs**, *Philip Brey, co-ordinator of the SATORI project, University of Twente*
